Title : Superconducting Wire Rod and Method of Producing
The Same

RESPONSE TO RESTRICTION REQUIREMENT

Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450

Sir:

In response to the Restriction Requirement mailed on July 13, 2005, applicants elect, with traverse, Group I, Claims 1-6, for examination on the merits.

The Office Action based the restriction requirement on the assertion that the claimed product can be made with another materially different process, or the claimed process can be used to make a materially different product. However, there is no showing in the Office Action how the claimed product can otherwise be made, or what other product can be made with the claimed process. In fact, it is submitted that the claimed product cannot be made with another materially different process, and the claimed process cannot be used to make another materially different product. Accordingly, applicants respectfully submit that the restriction requirement is improper and should be withdrawn.
